

If you are as nuts about keeping your car as clean and protected as I am, finding the quickest and most effective product to protecting it's shine and finish is paramount. I think TopCoat may just be the answer. I have applied it after each wash and it provides me with the protection **and velvet touch** which other products fail to deliver. .. And no waxy build up! Congratulations on developing a one stage, spray on protectant that really works. Thanks. rich
